

DISCOVER THE MANY WONDERFUL USES OF

Kleen Green Naturally™

ENZYME CLEANER

CONCENTRATE

Chemical Free

A NATURAL MULTI-PURPOSE ENZYME BASED CLEANER FOR:

Your Home, Office, Hotel, Hospital, Pet Clinic, Farm, Church or any other place that germs or pests hide.

ALSO VERY EFFECTIVE FOR:

Body Lice, Scabies, Fleas, Mites and all types of Plant and House Pests.

CONCENTRATE

THE MOST SUPERIOR NON-TOXIC REMEDY ON THE MARKET TODAY

✓ **KLEEN GREEN** is comprised of naturally occurring organic materials combined with surfactant and other biologically stimulating ingredients. Together, these ingredients form a very effective cleaning and odour-control product designed to help remove and eliminate dirt, germs, bacteria and assists in cleaning away pests.

✓ **KLEEN GREEN** is an organic, multi-enzyme-based product, non-toxic and ecologically compatible and contains protease, amylase, lipase and cellulose.

✓ The **KLEEN GREEN** formulation promotes penetration and emulsification of oily or fatty substances to increase micro-organism activity. This accelerates the destruction of odour causing conditions and makes it an excellent cleaning agent. Its proprietary formulation is non-hazardous and non-flammable.

✓ **KLEEN GREEN** is user friendly and eliminates the need for protective clothing, gloves and boots.

✓ Regular use of **KLEEN GREEN** will keep grease traps, drains, and septic systems free flowing and odourless. The product is available in multiple size containers.

SIZES:	16oz	32oz	64oz	168oz
Dilutes to make up to:	4 litres	8 litres	16 litres	42 litres

CHARACTERISTICS

Non-toxic: Non-irritating to most skin tissue (causes no rash or burn). If ingested accidentally in small amounts, may produce a laxative effect. If exposed to the eyes, flush immediately with water. Consult a physician.

Hypoallergenic: Contains no known allergens contributory to skin, respiratory or other allergies. No offensive odour. It is non-gaseous and can be used in poorly ventilated areas.

Non-flammable: Contains no combustible materials, is non-explosive and can be used near open flames.

Non-abrasive: Contains no abrasive ingredients and can be used on the most delicate surfaces and finishes that allow the use of water.

100% Rinsability: Washes off completely with water, leaving no stains or streaks. After rinsing, it leaves a non-static finish, thus inhibiting dust accumulation.

Easy application: Can be spray applied or poured onto surfaces to be treated. Does not require special equipment. The method used for application depends on the intended treatment or use.

Storage and shelf life: Should be stored below 50 degrees C. Freezing temperatures are not harmful. Shelf life is dependent upon storage temperatures, but up to three years is typical. It should be mixed well after any extended storage time.

NOTE: For external use only. Avoid eye contact. If accidental contact, flush eye thoroughly with cool water. Keep out of reach of children.

Contains NO PESTICIDES!

VERSATILE AND MULTIPURPOSE USES

The following list and directions are intended only as a guide to the many uses of **Kleen Green**. Individual needs may differ. Start with the suggested mix strength, and adjust to your needs. **ALWAYS TEST** in an inconspicuous area before using & **TEST** for colour fastness.

GENERAL DIRECTIONS: For general cleaning, simply spray on and wipe off. In some instances, waiting 1-2 minutes before wiping off is more effective. See chart for specific uses and strength. When a use is not specifically mentioned, follow the general instructions, and test in an inconspicuous place.

CONCENTRATED MIX USES: Apply **Kleen Green** - allow time to work then wipe, scrape or brush clean.

DRAINS/GREASE TRAPS: 30ml - 60ml, allow to sit, then pour in hot water.

TOILET BOWL: Add 30ml to bowl and allow to sit for 30 minutes, brush and flush.

STRONG MIX USES: 80ml per 5 litres of water - 3 tbs. per 750ml bottle. Spray, wait several minutes then wipe clean with a brush or rough towel. Repeat if necessary.

GENERAL MIX USES: 40ml per 5 litres of water - 2 tbsp. per 750ml in a spray bottle. Spray or wash and wipe off, or wait 1 - 2 minutes, then wipe clean.

PET STAINS AND ODOURS: To remove animal stains and odours from carpets or furniture, either spot clean by spraying with **Kleen Green** and blotting dry with a terry towel, or clean carpets as above.

KENNELS/STABLES: 60ml per 5 litres of water.. To deodorize kennel runs, patios, stables, trailers, remove animals and spray all areas.

PET ODOURS/DANDER: 80ml per 5 litres of water.. Spray coat or fur of pet (avoid eyes).

WASHING MACHINE: 30ml - 60ml to wash cycle, use in place of bleach to brighten and freshen.

LIGHT MIX USES: 30ml per 5 litres of water. If it is a glass or mirror streak or smear, dilute mix with additional water.

KLEEN GREEN DILUTION TREATMENTS

ALL PURPOSE CLEANER: 150ml to 5 litres of water to wash down your patio, yard or garden area. (Adjust dilution according to specific needs. One bottle yields many litres depending on the size of the bottle.)

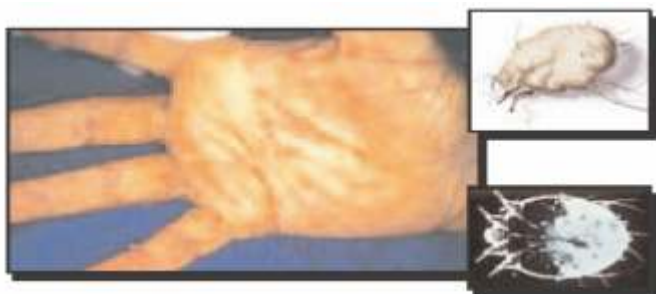

REMOVING SCABIES/PARASITES

Directions for Adults and Children with Scabies

■ Dilute **Kleen Green** using 100ml of concentrate with 700ml of water to use as a daily spray solution.

■ Apply directly on affected area with fingers, cotton ball or swab. Massage diluted **Kleen Green** onto dry skin. Allow **Kleen Green** to dry naturally when applied to the affected area. **DO NOT WASH OFF.**

■ Repeat this topical application daily to insure complete coverage - preferably morning, noon and night and before bedtime. Continue using until symptoms no longer persist - usually 1 to 3 weeks - depending on degree of infestation.

REMOVING PUBIC LICE (CRABS)

DIRECTIONS:

■ Dilute 100ml of **Kleen Green** concentrate with 700ml of water for solution to use as a spray.

■ **Pubic Lice - How to use:** Wet hair first, apply about 30ml of solution and work into a lather, allow to sit for five minutes. Do this no less than three times. Rinse and comb out lice with lukewarm water. Product should remove pubic lice and their eggs in one treatment. Inspect, and re-treat as needed. (If re-infestation occurs, this non-toxic product may be used immediately.)

RIDDING THE HOME OF FLEAS

■ Steam clean or vacuum thoroughly every day for two weeks. Dilute **Kleen Green Enzymes** at a ratio of **100ml to 700ml of water**. Spray or use in a carpet cleaner machine on and around carpet, rugs, baseboards and floors. **Kleen Green** is safe to spray on furniture if needed. Rinsing or wiping with clean water may be necessary if heavy application is used.

■ Carpet is the perfect flea environment! Steam clean with diluted **Kleen Green Enzymes**. This will remove dried blood, carpet fibres and other debris, diluted excrement, flea larva, eggs, adults, faeces and other food sources. Spray daily for 2 weeks over floors, carpets & rugs.

■ Spray gardens and loft spaces with **Kleen Green**, using 100ml to 700ml of water, spraying the yard with **Kleen Green** to control outside flea sources. Only shady and moist areas need to be sprayed. Spray at dawn or dusk only. Also try our **Yardguard** or **Natures Defender Cedar Spray**.

■ Other alternatives: Sprinkle baking soda/borax over mattresses, carpets, fabrics, suites and vacuum up after 12 hours.. Repeat as needed.

KLEEN GREEN ENZYME FOR PESTS

Bed bugs, these creepy crawling night stalkers, feast and feed by sucking human blood. They pierce the skin with their elongated beak like a hypodermic needle.

Bed bugs inject their victims with their saliva, which contains a numbing agent, like Novocain.

They drink until they become engorged with a person's blood - crawling away satisfied - until the next night.

The common bed bug (*Cimex lectularius* Linnaeus):

They "glue" their eggs in the hiding places. The nymphs hatch in about ten days and moult five times, taking a blood meal between each moult. The life cycle from egg to adult varies between 36 and 120 days. This life span depends on conditions as nymphs can survive long periods of starvation - up to a year!

MYSTERIOUS BITING MITES

UNIDENTIFIED SKIN PARASITES

Most individuals with this condition report disturbing crawling, stinging, and biting sensations. In addition, patients report the presence of seed-like granules and black speck-like material associated with their skin. Many are reporting being attacked by a near-microscopic biting mite that leaves the skin red, itchy, or stinging and covered in a patchy rash. Some have been plagued for months, even years.

ANNOYING, BOTHERSOME AND IRRITATING SYMPTOMS REPORTED BY SUFFERERS

- Stinging bites (sometimes over entire body). Often starts in pubic area of the body.
- Crawling sensation on the skin - even the scalp.
- Described like tiny pin-pricks, stings or bites and often cannot be seen, but definitely felt.
- Symptoms worsen at night, and in some cases severe itching and biting on the skin will disturb sleep patterns.
- Described looking like flecks of black pepper. Black small structures that looks almost like hair - and gives a crawling sensation.
- In some cases, they can change colours (red, green or blue - even iridescent).
- Some have also described a glitter like appearance.
- One or more family members are affected.
- Reports of threadlike-filament worms burrow into the skin. The filament has a hook on one end that is attached into the body and is whitish in colour.
- Reports of the microscopic mites can inhabit the eyebrows, eyelashes, mouth, nose and ears.
- They seem to reproduce in cotton clothing.
- Complaints that the mites inhabit the inside of the body, and are seen in bowel movements.
- Cause the person to feel fatigued/lethargic, reduced appetite, digestive problems.
- Appearance is like lint or fibres.

HOW TO TREAT BITING MITES

USE ON BODY, HAIR AND AS A SOAKING BATH

- Suggested Dilution: **100ml of Kleen Green to 700ml of water.**
- Relief from itching, biting, stinging and redness is experienced quickly.
- Apply diluted **Kleen Green** with a misting bottle, cotton ball or your hand.
- Apply to skin morning, noon and night. Use as often as needed.
- Do not wash off. Skin will feel calm and clean.
- Apply at night, before bedtime, as this problem seems more pronounced at night.
- Relief can be obtained by taking a soaking enzyme bath with **Kleen Green Enzymes**. **Simply pour 100ml or more (concentrated) into very warm bath water and soak approximately 20 minutes.**
- Use as a spray on the hair and scalp to stop any itch with everyday protection day and night. Safe to use as often as needed. **Apply and massage into damp hair, allow remaining for at least 5 minutes.** This non-toxic product provides superior cleaning in the entire home eradicating and digesting dirt, bacteria and microscopic mites - even dust mites.
- **Spray and/or mist cracks, crevices, around window and door frames daily for several days.** Persistence and patience will give the best results when using **Kleen Green**. No need to leave your home like that with pesticides. No toxic fumes. Offensive odours are eliminated.
- Safe to spray on all surfaces: carpet, bedding, walls, floors and furniture.
- **Kleen Green** may be used in the laundry and in carpet cleaning machines (30ml).
- **Pour 30ml of concentrate directly into wash load** without detergent for a fresh clean laundry.

TIP: **Kleen Green** is safe to use in humidifiers. Pour 50ml to 100ml into your humidifier for eliminating odours and controlling airborne bacteria, germs and pests. (As with any and all products, please avoid eye contact)

HOW TO USE KLEEN GREEN TO ASSIST YOU IN CLEANSING YOUR HOME AND BODY OF PESTS

- Instant cleaning away of pests when sprayed with **Kleen Green!**
- Add 50ml of **Kleen Green** concentrate to 350ml of water in a spray bottle. Product is safe for any water safe surface.
- Apply a light mist to the entire mattress. Pay particular attention in spraying mattress seams, buttons, folds and tears. Also spray the bottom of the mattress, box springs and bed frame. (Test spray small area first.)
- Wash and/or dry bedding/linens daily if necessary.
- The objective is not the quantity of spray used, but rather the proper placement of the enzyme cleaner.
- Spray **Kleen Green** into cracks, crevices and corners! BE THOROUGH.
- Remove any bed valance or dust ruffle.
- Coat legs of beds with Vaseline or oil. This prevents pests crawling up to the bed.
- Inspect and spray along skirting boards, window frames, wall paper edges, radiators and other mouldings. Check chairs, dressers, picture frames. Several sprays may be necessary to insure all hiding places are thoroughly sprayed.
- Vacuum thoroughly.
- Check behind pictures, drapes, wall sockets and even closets.
- **Do not spray electrical items with Kleen Green.**
- Pests travel on top of plumbing and heating pipes. Seal any space around plumbing pipes with a non-flammable material (aluminum foil, caulking, steel wool, duct tape). Then vacuum and spray **Kleen Green** liberally.

- ✓ **FAST ACTING** ✓ **EXTREMELY ECONOMICAL**
- ✓ **DOES NOT PRODUCE TOXIC FUMES**
- ✓ **MORE EFFECTIVE AND SAFER THAN PESTICIDES!**

MITES ASSOCIATED WITH CUTANEOUS REACTIONS

There are a number of mites that can bite human skin and result in a cutaneous reaction, as well as transmitting other diseases of, or affecting the human integumentary system:

Flour Mite (Baker's Itch); Fruit Mite (Grocer's Itch);
Bird & Poultry Mite; House Dust Mite; Hay Mite; Chigger
Trombiculid Mite; House Mouse Mite;
Tropical Rat Mite; Carpet Mite; Itch Mite (Scabies);
Chigger Harvest Mite; Cheese Mite.

Note: A free measure pot is included with each KG concentrated product. If this is broken in the transit of your parcel it can not be replaced. Please use a small glass as a measure or a measuring jug.

KLEEN GREEN NATURALLY

Kleen Green is designed to assist in the eradication and prevention of Invisible Biting mites, Bird mites, Scabies, Morgellons, Lyme Disease, Lice, Parasites, Itchy Skin Problems, Harvest Mites, Dust Mites and is an efficient cleaning product for all around your home, car and office.

Do you have any of these debilitating conditions?

We hear from many people who tell us they have paid out hundreds even thousands of pounds for several treatments for their home to be fumigated or house to be heat treated to remove insects such as bedbugs and mites to be told no insect is visible around their home.

Customers inform us they follow a path of having seen their Doctor and are automatically told it is Scabies and to use the prescribed pesticide creams from their GP - Lyclear or Derbac M.

You use these creams several times, over the coming weeks but find you are itching worse than ever.

The next step you take is to see a Dermatologist, obtaining an appointment (6 weeks wait) or you pay privately to speed up the process (usually £200 plus). They look at your skin for a few minutes and then tell you they can not see anything, and are asked to not fuss about it. But you still feel the pain of the bites or pin pricking and itching that never seems to go away.

You may have tried finding relief treatments such as tea tree oil, neem oil, mustard powder or other recommendations while searching the Internet to no avail. But they all have faults, and that is the smell, and being an oil, it will never be

possible to cleanse your clothes and home each week with these products or to clear anything which is not visible to the human eye.

These conditions caused by these type of products may well stop you going to work or seeing family members because they will ask you, "What is the horrible smell on your body"? Sadly this can lead to you being avoided by your family and friends with little contact with other people.

You then return to your Doctor who insists its scabies. If you persist with the Doctor, they will politely ask you to see a psychologist.

You can, in some cases be noted as suffering from Delusional Paranoia Syndrome. At this point, your Doctor or even family and friends doubt your word or proof of your skin problem. Nothing seems to resolve it or helps you with what you are going through on your body every day and night.

Eventually, people like you, find **Kleen Green**, which has been amazingly helpful across the world as a natural solution to so many people. Especially those who suffer Morgellons, Noseem's, Mite Infestations, Fleas, or unknown skin conditions. They recover and get the skin relief to return to a near-normal life or even clear away altogether any outbreak of many types of lice and mites which can be seen in the hair or clothing.

But more than this **Kleen Green** can help you if you use the **Kleen Green** method of cleansing/fumigation of your home and body. Protecting the body from itching and bites, allowing you to feel skin relief from the crazy itching and gain control of the problem while you seek the answers to any questions from medical professionals.

Kleen Green concentrate along with other Natural Enzymes Pest Elimination products will help you take control, and you will see the skin itching or biting problem diminish significantly over the coming weeks.

You must be proactive and take action yourself. Your situation will not be resolved or stopped on its own.

The NHS is not able to offer help to you with the task of home and body cleansing. You need to start to take the necessary action to get normality back into your life. You may have attempted to find a solution to your problem already by trying some or all of the list mentioned above.

Everybody wants the name of the insect of what they are suffering! Just pick one, Biting Mites, Bird Mites, Morgellons Disease, the world is full of insects, and they travel with people all around the globe in luggage and clothing or on the body.

The insect's name isn't any help in stopping the biting, but the **Kleen Green** enzymes along with other helpful Natural Enzymes Pest Elimination products will allow you to gain control of your situation. Remember insect's will multiply.

*“Thank goodness I discovered the **Kleen Green** website. It saved my life! I've been using it for over a year now and along with the diet, it has helped me get my life back. It really does work! It stops the itching and zaps any protein/lava that comes out of my skin. I've still got some way to go to overcome this disease but using the natural enzymes keeps me safe as well as others that I come into contact with. I cannot sing its praises enough and will continue to use it for as long as necessary...”*

Patricia, from Sussex

Frequently Asked Questions.

What is Kleen Green?

Kleen Green product is made from natural enzymes extracted from fruit, a colour variation will occur but the strength of the product remains the same.

Are Kleen Green natural enzymes safe to use on a young child's skin?

Yes, use as a spray or lotion, and in with the bath water for natural treatment for scabies, and other body parasites such as fleas.

Is it safe, if licked?

Yes but it is not to be taken in large amounts internally. Always drink plenty of water if the enzymes are ingested by accident. Contact a health professional as a follow-up, if it is a large amount.

Can I spray Kleen Green on bedding, sofa's and flooring?

YES, with 1 x 7 dilution to use on insects i.e. one egg cup concentrate to 7 egg cups of water, which can be warm from the tap. The product can be safely sprayed over the bedding morning and night. A light mist sprayed and left to dry will be enough to deal with fleas, mites, bed bugs and other insects. Once **Kleen Green** is dry, it has completed the task of dissolving any organic matter, be it an insect, other grime or urine.

Kleen Green is a very good household cleaner too, use it anywhere on grease and grime, even your cooker. Spraying bedding is a cost saving of fuel bills on washing the

bedding daily. The same applies to sofa's and other furniture. A light mist sprayed on leather or any other fabric will be fine. You can wipe it off, if you so choose, after 15 minutes.

Use last thing at night as an air freshener spray to cover everything to clean the room of insects for the morning.

Clean Flooring: Mix 1 x 15 warm water mix, and wash / dry the floor, as you would with any floor cleaner or leave to dry naturally.

Also, spray clothing, coat pockets, collars, handbags, phone cases, and hairbrushes with a mist and let it dry, **Kleen Green** can be removed with soapy water from any item.

Do not spray electrical items with **Kleen Green** spray.

The protocol to follow for a severe Insect infestation of the body and home.

All situations and lifestyles are different, but an easy-to-follow method to begin with would be over 6 weeks to see results. Use a bottle made up to the dilution of 1 part concentrated **Kleen Green** to 7 parts warm water. Spray over your whole body, 3 to 4 times daily and even at night - on the body and scalp.

Take a shower using **SB Body Wash**, when you feel the need or at least twice a day in the shower, lather up on the body well and wait then rinse off, repeat if you feel the need. Use as many times as it takes to stop the itching or crawling feeling. This works fast in the first 2 weeks. If you find things feeling worse, slow down a little, then start up slowly once again.

If you feel the need for total body comfort, take a long nightly bath, adding into hot water 120mls up to 200mls of Concentrated **Kleen Green**, to aid a good night sleep and full body cleanse.

The **Kleen Green** product can be used as a lotion or poured over the head and body from a large 2 LTR measuring jug, do what suits your situation. 1 x 7 mix is required for insect removal.

Dab over the skin with a towel and allow as much skin as possible to dry naturally.

**DO NOT WASH OFF
DO NOT ADD OTHER PRODUCTS TO KLEEN GREEN**

Always dry your hair, and use a spray in conditioner to protect it for a few weeks. Also use a body lotion to keep skin soft or Castor Oil over the whole body. As **Kleen Green** can remove dead skin cells it seems like your skin is dry, this will pass, and your skin will renew.

If treating a less extreme case, then spray less times to suit your lifestyle. If you want them gone, then daily spraying is the only real way to do it, in a fast time.

UNDERSTANDING HOW THE KLEEN GREEN PRODUCT DEALS WITH INSECTS

The natural enzymes in **Kleen Green** cause them to shed the insect's skin and it dies.

Note, If the insect was about to shed the skin itself, you will need to spray it over again to kill it. — This is why after spraying once within 20 mins you may need to spray again sometimes, as there are insects yet to shed and die.

The need for spraying will get less as the weeks go on.

CASTOR OIL

Castor Oil is a safe and effective way to stop them entering the ears, nose, mouth and over the eyelids.

Castor Oil works well on all the body in stopping mites breeding, use daily as a lotion it gives many benefits to the skin.

A few drops rubbed into the skin nightly in all areas will stop them.

Also, Castor Oil is safe for the anus and private areas where they do hide away.

Castor Oil can be used all over the body and soles of the feet to suit you.

Also add Castor Oil 5 x TBL spoon to a **Kleen Green** bath, this will catch the insects around the bath so you can see how many or the type you have.

It may be slippery as you get out, be very careful, Use your common sense when treating yourself.

THESE ARE NATURAL PRODUCTS: NON TOXIC and effective if used correctly.

Take a detox salt bath every 4 days.

Use 1 large mug full of Borax, 1 mug of Epsom salts, 1 cup of Bi-carbonate sit in and cover the whole body and hair for 25 mins and then shower off. Spray the body with **Kleen Green** after 15 mins.

Tips - use latex gloves for applying anything to the skin. Do not eat food with your bare hands.

A plastic bottle with a point top bottle is great to keep Castor Oil in and use beside the bed at night on itching areas. Also, a point bottle top is helpful to keep the diluted enzymes in too, use the point top on an itching scalp at night or along the day. You can find this type of bottle in a hair colour box.

Tip / put a bin liner over your pillow and sellotape the end. Change your pillow case daily, knowing your pillow is safe from insects.

Buy plastic Dust covers used for decorating, buy from B&Q and used to cover the mattress or sofa's if you feel the need too.
